

INSTITUTIONAL DISTINCTIVENESS

G.V.M. Girls College, Sonipat with its open approach to empowering young girls and an innovative mindset keeps on evolving its own uniqueness to stand out among the rest of the institutions. GVMGC leads and the others follow. During the session 2023-24, the key element of the distinctiveness of the college was the promotion of scientific awareness in local schools, by going beyond the boundaries of traditional education and by fostering a love for science among young learners. This initiative reflected the approach of the college towards scientific literacy. It was an unusual effort on the part of teachers to enlighten the minds of Future scientists by cultivating their curiosity and inspiring them to have a problem solving mindset. Faculty members visited 18 schools to conduct interactive science sessions with near about 1000 students aiming to make science not only accessible but also enjoyable for students. By quoting real life examples to explain complex scientific concepts, they taught school students how to bridge the gap between theoretical knowledge and practical application. This initiative played a pivotal role in motivating young minds to pursue science as a career path. It was an unusual effort The initiative also strengthened the bond between the colleges and the local schools for upholding academic excellence as well as contributing to societal progress.

The celebration of the 'International Day of Women and Girls in Science' on Feb. 10, 2024 added significant dimension to GVMGC's proactive efforts to promote scientific awareness, to address gender disparity in science and to highlight the achievements of Women in Science by championing both science and gender equality. As such GVMGC stands out, distinguished as an institution that only educates but also inspires positive societal change.
